The Prototype

SBB in partnership with RE Wettingen–Aarau (–Olten) began operating train service with the attractive and distinctive Zugkraft Aargau livery in 1998. The train consisted of a total of five carriages – a control car, a first-class car and three second-class passenger cars of EW 1 type. Additional EW1 passenger cars with NPZ livery were added to extend the consist. The train consist was pulled by Re 4/4 II class locomotive with road number 11181 and Zugkraft Aargau livery.

The Piko Model:

Piko is producing the distinctive train as a **limited-edition five-car set**. All AC and DC cars feature factory-installed interior lighting. The **AC version** includes cars with current-conducting couplers.
